Sum of Impressions

Campaign & Channel Performance Overview

Conversion Rate by CampaignName

Sum of Conversions and CPA by Channel

Key Observations:

Event Channel has shown consistently highest ROI 52%-55% amongst all channels.
Event also have the highest CPA at Rs.139 but also highest Return, meaning people who attend are highly likely to purchase, but getting them is costly.
Email has lowest CPA at Rs.32, it converts leads into customers but total conversions remains low due to limited reach
Influencer have highest converted leads in 12 months 3k+

Campaign Wise Leads Generated VS Conversions

Sum of LeadsGenerated and Sum of Conversions by CampaignName

Key Observations:

Social Media generates the most leads 631 avg but only converts 34%, highest leads but lowest efficiency.
Event has the lowest leads 285 avg but highest conversion rate 53% smallest but most purchase-ready audience.
Social Media pulls in the most leads but loses 66% of them. Reason: broad targeting attracts browsers not buyers. Without retargeting or follow-up sequences, these leads go cold before purchasing.

Channel	Average of LeadsGenerated	Average of Conversions	Conversion Rate
Email	345.83	107.83	31.18
Event	285.83	152.50	53.35
Influencer	504.17	248.75	49.34
Social Media	631.67	212.92	33.71
Total	441.88	180.50	40.85

Marketing Budget Allocation

ROI % by Channel

CPA by Channel

Conversion Rate by Channel

Key Observations:

Influencer dominates ROI share at 40.82%, showing it receiving the largest budget allocation going forward.

Social Media follows at 26.46% ROI share, second most valuable channel for returns.

Event holds 21.95% ROI share despite having the highest CPA 139. High revenue per conversion justifies maintained but capped spending.

Email contributes only 10.77% of total ROI share but has the cheapest CPA at just Rs.32 massively underinvested relative to its efficiency.

Budget should follow ROI share for Influencer and Social Media, while Email deserves a higher allocation than its current ROI share suggests given its exceptional cost efficiency.

Sum of RevenueGenerated by Month

Sum of Spend and Sum of RevenueGenerated by Channel

ROI % by Month and Channel

Channel ● Email ● Event ● Influencer ● Social Media

**Key Observations:**

Revenue dips in July across all channels and surges October through December this pattern is consistent and predictable. Email performs strongly year-round, not just during festive season it earns the most back every single month. Social Media and Event spend similarly but Social Media returns more Event is the weaker investment at the same cost level. July is the worst month to spend heavily. Budget saved in July is better deployed in October when returns are significantly higher.

Channel Performance Summary

Channel	Average of Spend	Average of LeadsGenerated	Average of RevenueGenerated	ROI %	Average of Conversions	CPA
Email	3458.33	345.83	21875.00	532.53	107.83	32.07
Event	21250.00	285.83	44583.33	109.80	152.50	139.34
Influencer	26916.67	504.17	82916.67	208.05	248.75	108.21
Social Media	18083.33	631.67	53750.00	197.24	212.92	84.93
Total	17427.08	441.88	50781.25	191.39	180.50	96.55

Key Observations about channels:

- 1) Email has lowest spend (3.4K) but solid conversions - most cost efficient channel
- 2) Influencer highest revenue (82K avg) but also highest spend - good but costly
- 3) Social Media generates most leads - best top-of-funnel channel
- 4) Event highest CPA (139) - most expensive to acquire one customer

Recommendations:

- 1) Scale Email - low spend, decent conversions, CPA only 32
- 2) Maintain Influencer — high revenue justifies cost
- 3) Use Social Media for awareness/lead generation campaigns
- 4) Reduce Event budget - high CPA, lowest leads generated

Strategic Recommendations

QUICK WINS (0–3 months)

- 1) Scale Email campaigns CPA of Rs32, cheapest acquisition channel.
- 2) Increase Influencer budget in Oct–Dec highest revenue months.
- 3) Use Social Media for lead generation , best lead generator amongst all channel.
- 4) Run few but better target Events, specially in Oct-Dec. Cut Event spending on Jan, Apr, July, Aug.

LONG-TERM STRATEGIES (3–12 months)

- 1) Budget Allocation: Influencer 40%, Email 25% , Social Media 25%, Event 10%.
- 2) Timing: Concentrate 40% of annual budget in Oct–Dec festive period
- 3) Audience Targeting: Email Sep/Aug/Mar show highest conversion rates. Analyze these audience segments and repeat.
- 4) Influencer campaigns drive revenue but cost is rising negotiate fixed-fee deals vs commission.
- 5) Lead Quality: High leads in Social Media but lower conversion rate, rework targeting to attract high intent audience not just traffic.
